The right floor care – made easy

Don't just look after your floor. Protect a part of your quality of life, too!

HARO floor coverings turn proper floor care into a child's play ritual – just a few simple steps are all it takes.

From gentle dry cleaning with a broom to damp mopping the surface – our floors always remain spotless. Don't forget the small details that make the difference in the long term: Felt glides, Teflon pads, polycarbonate mats if necessary and dirt-trapping mats that protect not only the floor but also your nerves.

But it's not just about aesthetics. It's all about a healthy indoor climate that

allows wood to breathe and gives you a feeling of well-being. We recommend a room temperature of 20 degrees and a humidity of 30 % to 60 % – so not only does your floor feel good, but so do you.

And remember: Quality floors love quality care.

Put your trust in HARO care products, customised for every material and every challenge.

For commercial use, we are personally on hand to help you find the best solution for your floor.

Care is more than just cleaning. It is the attention to detail that makes your floor and your home something very special.

Sustainability

The HARO brand stands for floors with naturally beautiful surfaces.

To ensure that your HARO floor retains this beauty for as long as possible, we have developed a range of cleaning and care products that provide optimum cleaning and care while protecting the environment.

The products are certified with the EU Ecolabel and Germany's Blue Angel environmental label

They contain no microplastics and are environmentally friendly thanks to the particularly economical concentrate.

The bottles are made of 50 % recycled material and are 100 % recyclable.

Of course, you can also treat all other hard floor coverings with the HARO range of cleaning and care products.

Maintain floors properly. Practical and simple.

Regular cleaning in everyday life

Removes dirt quickly and easily while protecting your floor.

Basic cleaning

Cleans floors down to the pores and removes even heavy soiling. Can also be applied specifically to individual areas as well as to the entire surface. After extensive application, the floor should be treated with HARO Intensive Care or HARO Refresher for further protection, depending on the floor covering.

Intensive care and refreshing

For intensive care or refreshing floors after cleaning with HARO Basic Cleaner. HARO Intensive Care and Refresher increase the moisture protection and durability of floors.

Tip
Our intensive care is also available for dark and white oiled natural floors.

Cleaning and care of oiled floors

- Natural oil surface
- Oiled parquet (naturalIn plus) 
- Spa parquet 
- Oiled cork floor
- Linoleum floor
- Open-pore stone floors

Regular cleaning with HARO Parquet Cleaner

Our parquet cleaner is more than just a cleaning product – it is a declaration of love for your parquet. Specially developed for modern, environmentally conscious households, it offers ease of use and environmentally friendly cleaning power.

Application: Wipe care for regular everyday cleaning and additional surface protection. Wipe with a damp cloth using a flat mop.

Scan here for more information on the care range

Basic cleaning with HARO Basic Cleaner

For basic cleaning of your floor, HARO Basic Cleaner is always at your side – stubborn stains such as rubber marks or grease can be removed effortlessly.

Application: Basic cleaner before intensive care as well as basic cleaner for heavily soiled floors. Wipe with a damp cloth using a flat mop.

Care with HARO Intensive Care

HARO Intensive Care opens up a new era of floor care for oiled floors – so simple that really anyone can use it. This avoids costs for expensive maintenance machines or craftsmen. The care product for oiled parquet, which is based on raw materials such as linseed oil, is 100 % solvent-free.

Application: For the initial care and regular aftercare of oiled natural floors with a Wischliesel flat wet-mop. For spa parquet, the intensive care must be applied twice to ensure sufficient protection against moisture penetration. Clean thoroughly with the basic cleaner beforehand.

Professional products for the craftsman. To be applied with a single-brush floor care machine.

Professional products for craftsmen for the initial and intensive care of oiled parquet

naturaLin Oil

For the real wood experience

Give your parquet the care it deserves. HARO naturaLin Oil is a supplementary initial and intensive care product for your parquet with naturaLin surface. HARO naturaLin Oil makes your floor more resistant. Every drop of oil is a tribute to nature and a guarantee for the long-lasting natural beauty of the wood.

Application:

For initial and intensive care, spray on thinly and evenly using a spray bottle and polish with a single-brush floor care machine. To be carried out by a craftsman.

HARO Oil Balm

Care for your parquet floors with a bioTec oil/wax finish

HARO Oil Balm is suitable as a special care product where initial repair work is required on a stressed and already heavily used parquet floor with bioTec oil/wax finish. HARO Oil Balm is also suitable for treating the surface of unfinished, sanded parquet so that everything shines again afterwards.

Application:

Spray on a thin and even layer of special care product for repair work using a spray bottle and polish with a single-brush floor care machine. To be carried out by a craftsman.
